Aeron® Chairs

BREAKTHROUGH ERGONOMICS, VERSATILE LOOKS

Some designs defy imitation, and the Aeron chair is one of them. Bill Stumpf and Don Chadwick purposefully designed it to be like no other chair—replacing foam and fabric with a breathable, form-fitting material and using science to achieve new levels of comfort and support. Extensive research shaped the original design. Continuing research ensures that Aeron remains the benchmark for performance in ergonomic seating. Available in three sizes, Aeron fits people of all statures, adapting and adjusting to them throughout the day. Its wide range of material and finish options makes it welcome in spaces from formal to contemporary. You won't find anything else like it, anywhere.

ADJUSTING THE AERON CHAIR

Active adjustments give people control over their own comfort and support.

1. Seat height – A two-stage pneumatic lift adjusts the seat height from 14³/₈ to 19¹/₂ inches on the A-size chair and from 15 to 20¹/₈ inches on B- and C-size chairs.
2. Tilt tension – This adjustment lets you control the resistance felt when you lean back.
3. Armrest height and angle – Each armrest adjusts independently in a 4-inch range. Armrests pivot 17¹/₂ degrees inward for keyboarding and 15 degrees outward for mousing.
4. Lumbar support – The lumbar pad adjusts vertically through a 4¹/₂-inch range. Its depth can be set at either ³/₄ or 1³/₄ inches. The lumbar pad is also available on the side chair.
5. PostureFit – A half turn of a knob moves PostureFit through the full range of its adjustability to provide the desired level of support.
6. Forward tilt – This adjustment positions the chair 5 degrees forward for intensive work postures.
7. Tilt limiter – The limiter lets you control the tilt range without being locked in a single position.

ADVANCED ERGONOMICS

Aeron's Kinemat[®] tilt allows the body to pivot naturally and simultaneously at the ankles, knees, and hips for smooth, proper support in any seated position. Because continuing research has shown that many people are sitting upright and forward, Aeron offers the PostureFit[®] option. It provides custom-fitted support at the lower back that promotes proper alignment of the spine for a healthful, comfortable posture.

REFRESHED AESTHETICS

Extensive material and finish choices make Aeron a comfortable addition to nearly any interior. From the pinstripe look of Classic to the gentle swell of Waves to the geometric shape of Tuxedo, Pellicle patterns in neutral colors offer a variety of choices. Titanium, polished aluminum, and graphite finishes complement the full selection of Pellicle colors.

COOL COMFORT

Aeron is the only chair with Pellicle® suspension, a unique material that conforms to the body and distributes weight evenly over the seat and back for truly customized support. Air circulates through the Pellicle, keeping the sitter comfortable by preventing body heat build-up. Each of the available Pellicle patterns delivers the same unique level of custom-fitted support and breathability.

SIZED TO FIT

Aeron chairs come in three sizes. The B size is the best fit for most people. The A size fits those who are smaller and lighter; the C size fits taller and heavier people. Anybody—from the 1st percentile female to the 99th percentile male—can find a perfect Aeron fit.

Pellicle Classic

Pellicle Waves

Pellicle Tuxedo

Herman Miller builds the Aeron chair responsibly, conscious of its environmental impact. Many of its parts are made from recycled materials, including the base, which is recycled aluminum, and the frame, made from recycled polymer.

12-YEAR, 3-SHIFT WARRANTY

Like all Herman Miller products, the Aeron chair is durable for long-term performance and value. As a statement of our confidence in its quality, the Aeron chair is covered by the Herman Miller Warranty—a straightforward promise that we stand behind that quality 100 percent. The 12-year, 3-shift warranty covers all standard elements and includes labor on all warranty work.
